### How to put on your mask

Before putting on a mask, wash your hands with a water-alcohol solution or soap and water.

ALWAYS hold the mask by the rubber bands, do not touch the textile surface of the mask. Pull on the rubber bands to put the mask on.

Cover your mouth and nose with the mask and make sure there are no gaps between your face and the mask. Monitor the placement, use and removal of the mask in minors.

### How to remove and discard the mask

Also, avoid touching the OUTSIDE textile parts of the mask. Pull the rubber bands from behind to remove the mask.

Secure the fold with the rubber bands and wash according to the recommended instructions. We recommend handwashing and air-drying.

Fold the mask in two halves, always touching the INNER textile part, never the OUTSIDE.

Wash your hands again with water-alcohol solution or soap and water after handling.

### Tips for using the mask

- For comfort and sanitary reasons, it is recommended not to use the mask for more than 4 hours.
- The mask should be washed whenever it becomes dirty, wet or cannot be placed properly on the face.
- Do not use the mask if it is dirty or wet.
- If it is to be stored temporarily, contact with any surface should be avoided.
- Nor should it be placed in a waiting position on the forehead or under the chin during and after each use.
